

JS Foundation

It may not happen now but
however will **happen for sure**

Today's Agenda

1

What is Programming?

2

Keywords

3

Arithmetic Operators

4

Comparison Operators

5

Logical Operators

6

Assignment Operators

7

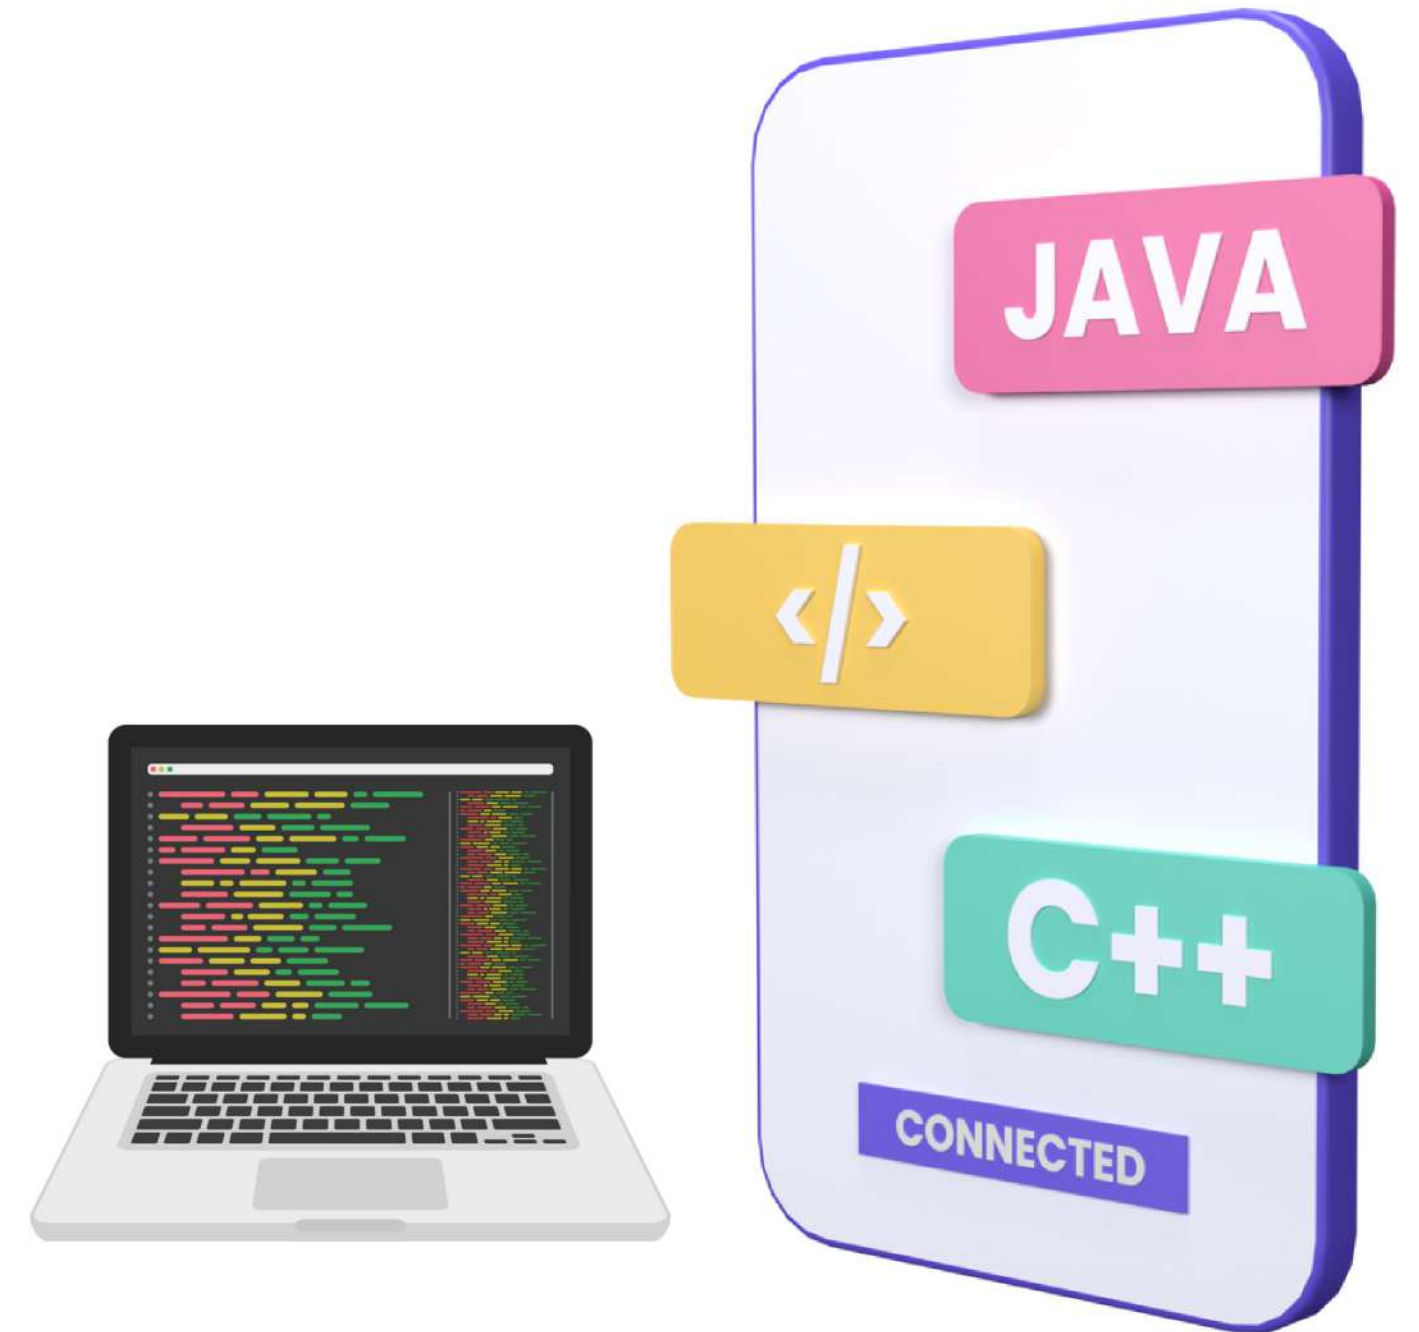

Data Types

8

Functions

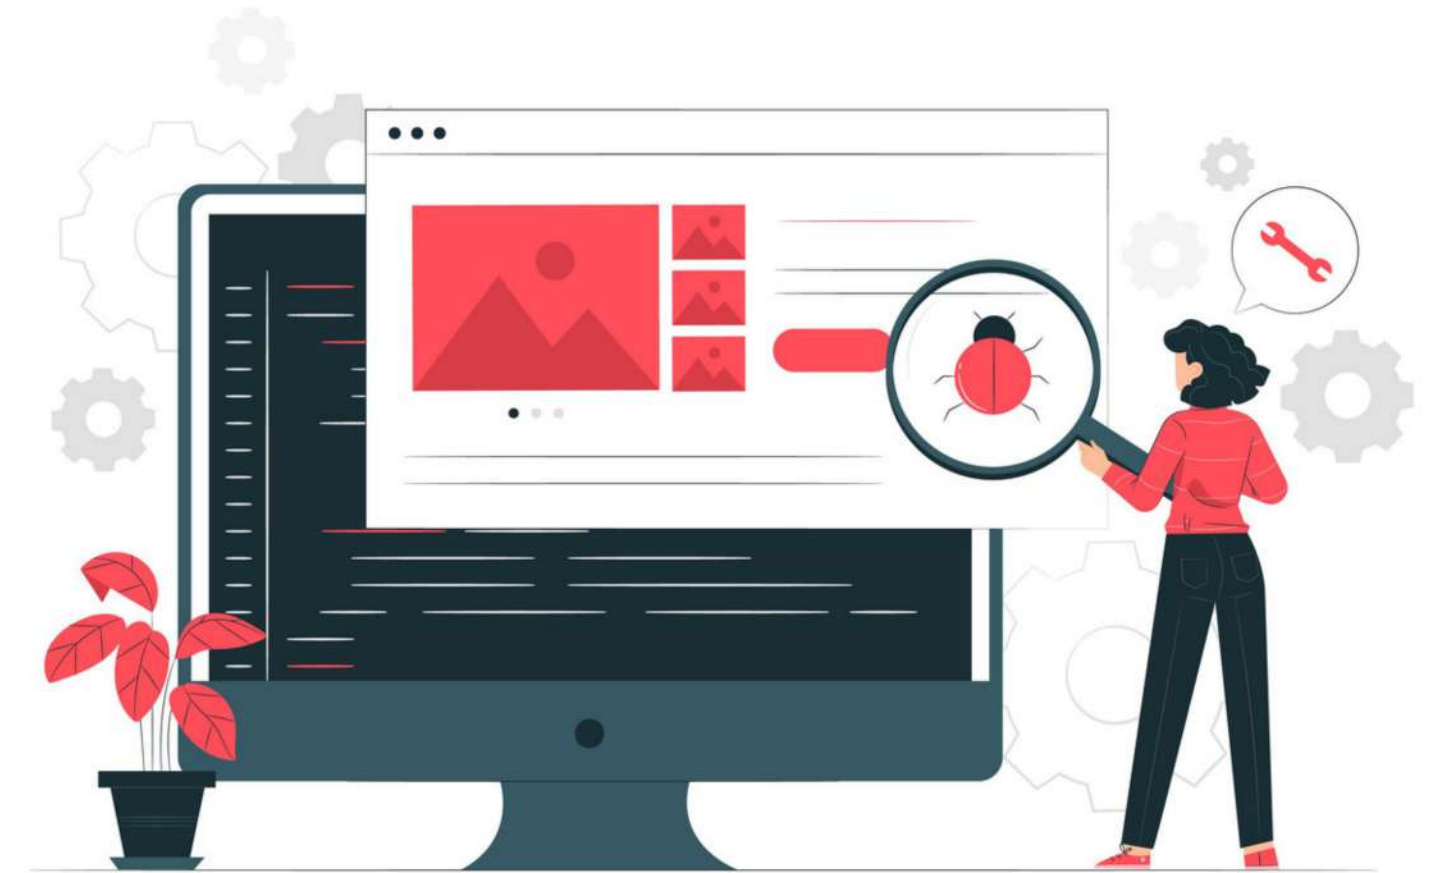

What is Programming?

Give instruction to your computer to perform task

Debugging

A good **programmer** can code well & an **amazing** one can code & **debug** like a pro.

Types of programming

Let's know more about it.

1

High Level

C, C++, Java, Python, JavaScript

2

Low Level

Assembly

What we need to know in programming

Let's know more about it.

1

Keywords

2

Variables

3

Operators

4

Conditional Statements

5

Loops

6

Functions

7

Inbuilt Methods

8

Data Types

9

Code Execution Flow

Keywords for variables

Let's know more about it.

1

Var
Old JS

2

Let
ES6

3

Const
ES6

Note: A variable name can starts with a character or _ or \$ only. Numbers are not allowed

Valid

let a = 10;
let _a = 10
let \$a = 10

Invalid

let 2a = 10
let &a = 20

Arithmetic Operators

Let's know more about it.

1

+
Add

2

-
Subtract

3

*
Multiply

4

/
Divide

5

%
Modulus

Comparison Operators

Let's know more about it.

1

`==`
Double Equal

2

`===`
Tripple Equal

3

`!=`
Not Equal

4

`!==`
Not Double equals

5

`>`
Greater

5

`<`
Less

6

`>=`
Greater & Equal

7

`<=`
Less than & equals

8

`?`
Ternary Operators

Assignment Operators

Let's know more about it.

1

=
Equal

2

+=
Plus

3

-=
Subtract

4

*=
Multiply

5

/=
Divide

5

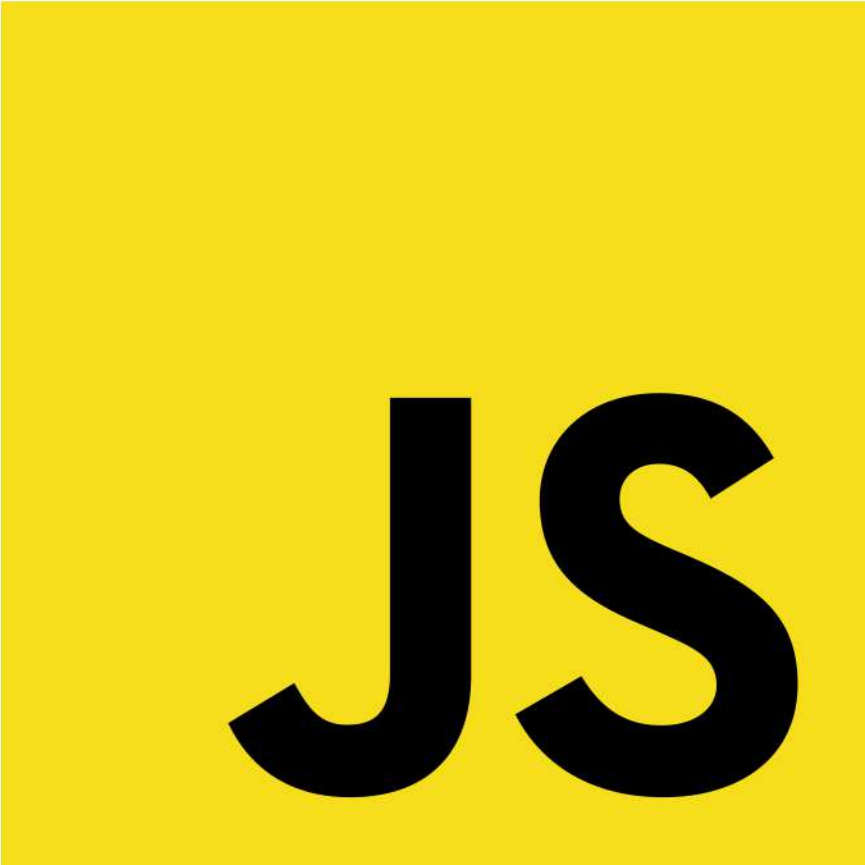

%=
Modulus

4

**=
Power

Functions

It's a technique to reuse the code. Let's see how does it works?

A solid yellow square located in the bottom right corner of the slide. Inside the square, the letters 'JS' are written in a large, bold, black, sans-serif font.

JS

Function

Let's know more about it.

1

Argument

What we pass

2

Parameters

What we accept

3

Return statement

What we return

4

Default Return

Undefined

5

Break

To break the flow

6

Types

Multiple

Thank you!
